Frameless Heavy Doors

These doors are available in a wide range of metal finishes including Brushed Nickel and Oil Rubbed Bronze. Our frameless heavy door collection offers premium glass options in both 3/8" and 1/2" thicknesses.

M3/8-800

This enclosure features a frameless door with a stationary in-line panel to maintain an open, spacious feel.

M3/8-300

When a single door is needed, this door is a great option. With no top header, this look is clean and light.

M3/8-1000

The design of this frameless enclosure adds character and elegance to any bath. This door style is frequently used beside a garden tub.

Semi-Frameless Bypass Doors

The doors are available in a wide range of metal finishes and premium glass options ranging from 3/16" to 3/8" thickness.

FSE1600

Designed with a European flair, our FSE1600 has a gently curved top rail. The stylish doors are featured with the handles and towel bar installed through the 1/4" glass.

FLSE1600

Practical, yet contemporary, this door has 3/16" thick glass and compression fit towel bars. For those who like the "Euro" look of the FSE1600, this door may be for you.

FSE48

For a frameless look without the European design, this door may be your answer. It is made with a double towel bar and 3/16" thick glass . . . craftsmanship with affordability!

Semi-Frameless Hinged Doors

The doors are available in a wide range of metal finishes and premium glass options ranging from 3/16" to 1/4" thickness.

FQ1000

The two-sided corner door would be an enhancement to any bath. The frameless door, along with an optional glass-to-glass corner, offers an elegant, open appearance.

FQ185

Increased visibility is one of the benefits of the FQ185. The frameless door reduces the amount of metal required for a more sophisticated design.

FQ300

A semi-frameless door minimizes the use of metal, offering an open appearance. The handle is designed to go through the glass, giving a heavy glass appearance on a more practical scale.

Framed Hinged Doors

These doors are offered in either smooth or fluted metal with bright silver or bright gold finish. A wide variety of glass options are available to enhance the appearance of your bath.

M-1000

If you prefer the look of a hinged door to a bypass, this door is for you. It is available in various widths and configurations to accommodate your needs.

M-185

This door is available as shown or with additional panels for unique applications. It has been a long standing favorite in the Swan line of shower doors.

M-300

The M-300 is a simple yet effective application that suits the needs of many. Its sturdy construction offers years of proven service and reliability.

Framed Hinged Doors

These doors are offered in smooth metal with bright silver or bright gold finish.
A wide variety of glass options are available in this collection.

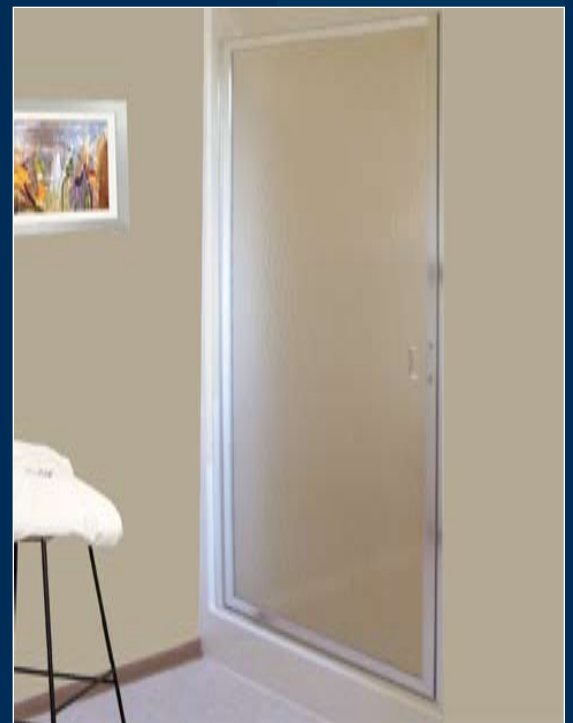

M-74

A variety of glass options can add a touch of elegance to this door. The smooth channel maintains strength without detracting from your décor.

M-78

The options for this time-tested door can provide elegance and style with years of reliability. This door can be configured with the stationary panel on either side.

M-30

This door offers a very simple, yet durable design. The smooth channel and a variety of glass options offers the ability to create a unique, contemporary appearance.

Framed Bypass Doors

Depending on the model, these doors are offered in smooth and fluted metal with bright silver and bright gold finish. A wide variety of glass options are available in the framed bypass collection.

M-290

With a beautiful, rounded “Euro” style header and gently contoured smooth channel, this door works well with any décor. It is also available in brushed nickel and the towel bar and handle can be installed through the glass.

M-190

Truly time-tested, the M-190 has been in the Swan line of bypass shower doors from the very beginning. It is constructed with fluted channel and an easy clean track.

M- 91

This very versatile, practical shower door has smooth channel construction to offer stability with a contemporary appearance.

Specialty Doors

The specialty doors are designed to accommodate virtually any configuration. These custom doors are offered in a variety of metal finishes coupled with a wide range of glass types and thicknesses.

This specialty door is a custom neo-angle door that uses five panels of glass to create a symmetrical appearance. It is constructed from 3/8" glass which is custom mitered at the angles where the panels meet. This glass to glass application adds true elegance to any décor.

This is an example of a specialty door built to the homeowners specifications. It has a return panel plus an extra panel to take advantage of the spaciousness of this custom bathroom. SwanFreedom associates can design shower enclosures for any situation.

Glass Options

The choice of glass helps create the “look” of a bathroom by creating a more open feel, a sleek, contemporary look, a more subtle atmosphere or a traditional style. Just the look you will love!

Care of Glass Shower Doors

Keeping your glass shower door clean can be accomplished by minimal daily maintenance.

Use products recommended for cleaning glass but that do NOT contain vinegar or ammonia. While vinegar and ammonia are frequently recommended for cleaning glass, they could damage the metals that surround the glass. Steel, teflon pads and abrasive powders also should not be used. You can enjoy your glass shower doors for years with minimal care. All of our doors come with easy clean tracks that make keeping them clean nearly effortless.
